European Technical Assessment

ETA 14/0424 of 23/04/2021

English translation prepared by IETcc. Original version in Spanish language

General Part

Technical Assessment Body issuing the ETA designated according to Art. 29 of Regulation (EU) 305/2011:

Instituto de Ciencias de la Construcción Eduardo Torroja (IETcc)

Trade name of the construction product:

**Anchor TP CCA
Anchor TP CCA-G
Anchor TP CCA-X**

Product family to which the construction product belongs:

Torque controlled expansion anchor made of galvanized steel or sherardized steel of sizes M8, M10, M12, M16, M20 and M24 for use in cracked or uncracked concrete.

Manufacturer:

TEAM PRO INTERNATIONAL FZCO
Office n° LBO07002. Jebel Ali. Dubai.
United Arab Emirates

Manufacturing plants:

Team Pro plant 1

This European Technical Assessment contains:

14 pages including 3 annexes which form an integral part of this assessment.

This European Technical Assessment is issued in accordance with regulation (EU) No 305/2011, on the basis of:

European Technical Assessment EAD 330232-00-0601 "Mechanical Fasteners for use in concrete", ed. October 2016

This version replaces:

ETA 14/0424, issued on 18/05/2015

English translation prepared by IETcc

This European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission according to article 25 (3) of Regulation (EU) No 305/2011.

SPECIFIC PART

1. Technical description of the product

The Team Pro TP CCA wedge anchor in the range of M8, M10, M12, M16, M20 and M24 is an anchor made of galvanised steel. The Team Pro TP CCA-G wedge anchor in the range of M8, M10, M12, M16 and M20 is an anchor made of sherardized steel. The Team Pro TP CCA-X wedge anchor in the range of M8, M10, M12, M16 and M20 is an anchor made of galvanized steel. The anchor is installed into a predrilled cylindrical hole and anchored by torque-controlled expansion. The anchorage is characterised by friction between expansion clip and concrete.

Product and installation descriptions are given in annexes A1 and A2.

2. Specification of the intended use in accordance with the applicable European Assessment Document.

The performances given in section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a mean to choosing the right products in relation to the expected economically reasonable working life of the works.

3. Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance under static or quasi static loading	See annexes C1 to C3
Displacements under tension and shear loads	See annex C4
Characteristic resistance under seismic loading categories C1 and C2	See annex C5 and C6

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for class A1
Resistance to fire	See annex C7

4. Assessment and Verification of Constancy of Performances (hereinafter AVCP) system applied, with reference to its legal base

The applicable European legal act for the system of Assessment and Verification of Constancy of Performances (see annex V to Regulation (EU) No 305/2011) is 96/582/EC.

The system to be applied is 1.

English translation prepared by IETcc

5. Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document.

The technical details necessary for the implementation of the AVCP system are laid down in the quality plan deposited at Instituto de Ciencias de la Construcción Eduardo Torroja.

Instituto de Ciencias de la Construcción Eduardo Torroja

Product and installed condition

TP CCA, TP CCA-G, TP CCA-X anchor

Identification on anchor:

- Expansion clip:
 - Anchor TP CCA: Company logo + “TP CCA” + Metric.
 - Anchor TP CCA-G: Company logo + “TP CCA-G” + Metric.
 - Anchor TP CCA-X: Company logo + “TP CCA-X” + Metric.
- Anchor body: Metric x Length
- Blue ring mark to show embedment depth
- Length letter code on head:

Letter on head	Length [mm]
C	68 ÷ 75
D	76 ÷ 88
E	89 ÷ 101
F	102 ÷ 113
G	114 ÷ 126
H	127 ÷ 139

Letter on head	Length [mm]
I	140 ÷ 151
J	152 ÷ 164
K	165 ÷ 177
L	178 ÷ 190
M	191 ÷ 202
N	203 ÷ 215

Letter on head	Length [mm]
P	229 ÷ 240
Q	241 ÷ 253
R	254 ÷ 266
S	267 ÷ 300

- d₀: Nominal diameter of drill bit
- d_f: Fixture clearance hole diameter
- h_{ef}: Effective anchorage depth
- h₁: Depth of drilled hole
- h_{nom}: Overall anchor embedment depth in the concrete
- h_{min}: Minimum thickness of concrete member
- t_{fix}: Fixture thickness

TP CCA, TP CCA-G, TP CCA-X anchor

Product description

Materials

Annex A2

Specifications of intended use

Anchorage subjected to:

- Static or quasi static loads
- Seismic actions:
 - for performance category C1:
 - TP CCA: M10, M12 and M16
 - TP CCA-X: M8, M10, M12, M16 and M20
 - for performance category C2:
 - TP CCA: M12 and M16
 - TP CCA-X: M10, M12 and M20
- Resistance to fire exposure up to 120 minutes: all versions and sizes

Base materials:

- Reinforced or unreinforced normal weight concrete according to EN 206-1:2013
- Strength classes C20/25 to C50/60 according to EN 206-1:2013
- Cracked or uncracked concrete

Use conditions (environmental conditions):

- Anchorages subjected to dry internal conditions.

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete.
- Verifiable calculation rules and drawings are prepared taking into account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.).
- Anchorages under static or quasi-static actions are designed for design method A in accordance with EN 1994-4:2018
- Anchorages under seismic actions are designed in accordance with EN 1992-4:2018. Anchorages shall be positioned outside of critical regions (e.g. plastic hinges) of the concrete structure. Fastening in stand-off installation or with grout layer are not allowed.
- Anchorages under fire exposure are designed in accordance with EN 1992-4:2018. It must be ensured that local spalling of the concrete cover does not occur.

Installation:

- Hole drilling by rotary plus hammer mode.
- Anchor installation carried out by appropriately qualified personal and under the supervision of the person responsible for technical matters of the site.
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of aborted hole or smaller distance if the aborted hole is filled with high strength mortar and if under shear or oblique tension load it is not the direction of the load application.

		R120 [kN]	0,2	0,5	0,8	1,6	2,5	3,5
$M^0_{Rk,s,fi}$	Characteristic bending resistance:	R30 [kN]	0,4	1,1	2,6	6,7	13,0	22,5
		R60 [kN]	0,3	1,0	2,0	5,0	9,7	16,8
		R90 [kN]	0,3	0,7	1,7	4,3	8,4	14,6
		R120 [kN]	0,2	0,6	1,3	3,3	6,5	11,2
Pull out failure								
$N_{Rk,p,fi}$	Characteristic resistance:	R30 [kN]						
		R60 [kN]	1,3/1,5 ³⁾	2,3	3,0/4,0 ³⁾	6,3	7,5	7,5
		R90 [kN]						
		R120 [kN]	1,0/1,2 ³⁾	1,8	2,4/3,2 ³⁾	5,0	6,0	6,0
Concrete cone failure ²⁾								
$N_{Rk,c,fi}$	Characteristic resistance:	R30 [kN]						
		R60 [kN]	2,9	5,0	7,4	12,0	18,0	31,4
		R90 [kN]						
		R120 [kN]	2,3	4,0	5,9	9,6	14,4	25,2
$S_{cr,N,fi}$	Critical spacing:	R30 to R120 [mm]	4 x h_{ef}					
$S_{min,fi}$	Minimum spacing:	R30 to R120 [mm]	50	60	70	85/128 ¹⁾	100/150 ¹⁾	125
$C_{cr,N,fi}$	Critical edge distance:	R30 to R120 [mm]	2 x h_{ef}					
$C_{min,fi}$	Minimum edge distance:	R30 to R120 [mm]	$C_{min} = 2 \times h_{ef}$; if fire attack comes from more than one side, the edge distance of the anchor has to be ≥ 300 mm and $\geq 2 \times h_{ef}$					
Concrete pry out failure								
k_8	Pryout factor:	R30 to R120 [-]	1	2	2	2	2	2

¹⁾ Respective values for anchors TP CCA / TP CCA-G, TP CCA-X

²⁾ As a rule, splitting failure can be neglected since cracked concrete and reinforcement is assumed.

In absence of other national regulations the partial safety factor for resistance under fire exposure $\gamma_{m,fi} = 1,0$ is recommended

TP CCA, TP CCA-G, TP CCA-X anchor	Annex C7
